

<b>LIST OF TABLES</b>		<b>Page</b>
Table 1	Key energy and economic indicators of focus countries	16
Table 2	Electricity generation by source in the focus countries in 2002	20
Table 3	Trends in fossil fuel consumption in the focus countries Asia (1980-2030)	23
Table 4	Increase in renewable energy consumption in Asia (1997- 2030)	23
Table 5	Cumulative required investments in energy supply infrastructure (2005-2030)	27
Table 6	Trends in electricity capacity addition (2005-2030) – Investment in the electricity sector	27
Table 7	Renewable electricity generation capacity installed as of 2003	39
Table 8	Regional installation and technical potential for wind, photovoltaic, and biomass in 2000 and 2050	40
Table 9	Energy efficiency opportunities across supply-side and end-use sectors	46
Table 10	Summary of medium-term energy efficiency potential and investment needs in focus countries	47
Table 11	Air pollution emissions based on life-cycle analysis for renewable energy	55
Table 12	CO <sub>2</sub> life-cycle air pollution emissions from fossil fuel sources	56
Table 13	Key barriers and remedies for regional action to catalyze scaled-up investment and deployment in clean energy technologies	76
Table 14	Opportunities for regional collaboration	87
Table 15	Criteria for selecting priority clean energy options	90
Table 16	Prioritization and ranking of clean energy options	90
Table 17	Summary of illustrative initiatives by technology and sector, showing barriers addressed	93
<b>LIST OF FIGURES</b>		<b>Page</b>
Figure 1	Priority ranking of energy technologies and sectors	10
Figure 2	Historical trends in primary energy demand by fuel type in the six focus countries	19
Figure 3	Primary energy mix in selected Asian countries (2005)	20
Figure 4	Growth in primary energy demand by fuel type in the focus countries	21
Figure 5	Average number of air conditioners per household in selected Asian countries (1980-2030)	22
Figure 6	Variation in aggregate energy intensity across Asian countries (2005)	22
Figure 7	Total electricity generation (1980-2030)	24
Figure 8	Current and predicted (in 2030) contribution of Developing Asia's Economies to global CO <sub>2</sub> levels	25
Figure 9	CO <sub>2</sub> emissions by sector in selected focus countries (1980-2030)	25

Figure 10	Criteria pollutant levels in Asian megacities	26
Figure 11	Trends in oil import dependency in the Asia-Pacific region (2002-2030)	26
Figure 12	Private equity investment in clean energy by region (2001-2006)	28
Figure 13	Contribution of coal to the total primary energy mix in selected Asian countries	32
Figure 14	Contribution of coal to total CO <sub>2</sub> emissions in selected Asian countries	32
Figure 15	Contribution of oil to the total primary energy mix in selected Asian countries	34
Figure 16	Projected reduction in PM10 and NO <sub>x</sub> emissions levels from the transport sector in China and India through 2035	35
Figure 17	Contribution of oil to total CO <sub>2</sub> emissions in selected Asian countries	36
Figure 18	Contribution of natural gas to the total primary energy mix in selected Asian countries	37
Figure 19	Contribution of natural gas to total CO <sub>2</sub> emissions in selected Asian economies	38
Figure 20	Impact of investment in demand-side electrical efficiency on supply-side investments as per IEA estimates	45
Figure 21	Cost of electricity in the US from various new sources	50
Figure 22	Generation cost estimates of alternative energy options (without external costs)	54
Figure 23	Air pollution emissions based on life-cycle analysis for fossil fuel sources	55
Figure 24	Costs of electricity options: generating plus externality costs	56
Figure 25	Learning curves for select clean electricity technologies in the European Union (1980-1995)	57
Figure 26	Cost of carbon reduced through alternative clean energy options	57
Figure 27	Estimate of jobs created per unit electricity produced from a range of renewable and fossil-fuel energy sources	58
Figure 28	Technology adoption curve for energy efficient technology and key customer barriers to adoption	62
Figure 29	Process of technology transfer and its various components	67
Figure 30	Frequency of use of tax incentives in 29 countries world-wide	69
Figure 31	Overview of the Asian Development Bank's clean energy programs	80
Figure 32	Summary of project types by APP task force	83
Figure 33	Schematic of process used to prioritize clean energy options for climate change mitigation	89
Figure 34	Ranking of clean energy options that can be implemented through a regional cooperation program	92
Figure 35	CO <sub>2</sub> reduction potential of selected priority options over the period 2002-2030	99
